

# “Healthy Safe Space”

Barjan's “Healthy Safe Space” brings you closer in any “social distancing” setting

**Healthy Safe Space clear, see-thru, virus-resistant barrier curtain is safe and effective!**

- Made from heavy duty clear see-thru 20 gauge vinyl
- Inherently fire-retardant (passes the NFPA-701 flame retardancy test)
- Non-Toxic
- Non-Porous
- Easy to clean and maintain while hanging

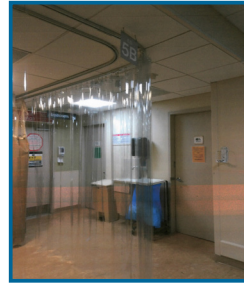

## HOSPITALS • NURSING HOMES • SURGI-CENTERS • DOCTORS' OFFICES • PHYSICAL THERAPY • GYMS

Barjan's Healthy Safe Space clear, see-thru, virus-resistant barrier curtain allows staff to monitor patients and visitors to see loved ones without entering their space.

Barjan's isolation barriers make patients feel less alone, while still protecting others from exposure to the COVID-19 virus.

Can be washed or spray cleaned with most disinfectants while hanging.

It is inherently fire-retardant (passing the NFPA-701 test for flammability).

Protect children and staff in the school nurse's office.

Young patients in the nurse's office need to be isolated, but shouldn't feel alone.

Barjan's Healthy Safe Space clear, see-thru, virus-resistant barrier curtain provides for health security and emotional health.

Can be used in classrooms and administrative areas, helping with social distancing in tight, close work areas.

Can be washed or spray cleaned with most disinfectants while hanging.

It is inherently fire-retardant (passing the NFPA-701 test for flammability).

## OFFICE AREAS • RESTAURANTS • INDOOR AREAS *where more than one person gathers*

Barjan's Healthy Safe Space clear, see-thru, virus-resistant barrier curtain helps protect individuals from exposure to the COVID-19 virus.

Maintains safety where more than one person gathers and in tight areas, such as work cubicles and cafeterias.

Wearing face masks while in your individual Healthy Safe Space is optional and may not be required for your protection.

Easy to clean and sanitize without removal. Simply wash or spray clean with most disinfectants while still hanging.

It is inherently fire-retardant (passing the NFPA-701 test for flammability).
